DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I, claims 1, 7 and 13, wherein the azide group occurs in place of an amino moiety (Species 1) and wherein the azide derivative is a purine (Species 2), in Paper No. 9 dated March 11, 2003 is acknowledged. The traversal is on the ground(s) that examination of the claims 1 and 7-13 without regard to the imposed species requirement would not impose a serious burden on the examiner. This is not found persuasive because the examiner is responsible for not only searching the art area but also the specific nature of the subject matter instantly claimed. Applicant's opinion that the examination of claims 1 and 7-13 without regard to the imposed species requirement would not impose a serious burden upon the examiner in charge of this application is duly noted. The examiner has reconsidered the species requirement in regards to Species 1. The examiner will examine species wherein the azide group occurs in place of A) an amino moiety or C) a hydroxyl moiety. The species requirement in regards to Species 2 is still deemed proper.
2. Claims 8-12, and 14-23 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention or species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 9 dated March 11, 2003.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1, 7, and 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicant has failed to particularly point out the identity of the compounds and the modifications to said compounds which distinctly set forth the structural core modifications. It is unclear where the modifications of structural core of the purine compounds occur. The instantly claimed composition is not defined or described in such a way as to reasonably apprise one of ordinary skill in the art of the metes and bounds of the invention. Applicant is advised to: 1) include general structural formula specifying the position of the azide moiety or 2) provide a chemical name of compounds readable upon the elected invention.

Conclusion

5. Claims 1 and 7-23 are pending. Claims 1, 7, and 13 are rejected. Claims 8-12 and 14-23 are withdrawn from further consideration as being drawn to a nonelected invention or species. Chu et al. (US Patent 6,271,212) is cited to show the state of the art.
